Why This Summer School?

Biological systems are intricately designed and function through complex interactions. To explore and understand these, modern techniques in Molecular Biology and Bio-Informatics are indispensable. This summer school aims to introduce UG and PG students to these cutting-edge tools, equipping them with practical skills and conceptual clarity in the age of Artificial Intelligence and Robotics.

OBJECTIVES

- Understand principles behind biological techniques.
- Learn SOPs of delicate and modern apparatus.
- Develop in silico research skills.
- Understand Bio-Safety protocols.

ACTIVITIES

Lectures

By distinguished experts and invited guests.

Virtual Demonstrations

Of advanced molecular biology instruments.

No Registration Fees
