

Water treatment plant Rajghat, Sagar

Students of Institute of Engineering and Technology visited **WTP RAJGHAT** and they got the following information:

- Different sources of supply of water to sagar city .
- About Treatment process (screening, aeration, sedimentation, coagulation, flocculation, filtration, disinfection)
- Water quality parameters for drinking purpose (alkalinity, hardness, pH, TDS etc.)
- Distribution of water to sagar city.

We hope for your continued success.
