The GATE 2021 score is calculated using the formula

GATE Score = $S_o + (S_t - S_t)$

where,

M is the marks obtained by the candidate in the paper, mentioned on this GATE 2021 scorecard

M_ois the qualifying marks for general category candidate in the paper

M, is the mean of marks of top 0.1% or top 10 (whichever is larger) of the candidates who appeared in the paper (in case of multi-session papers including all sessions)

 $S_{n} = 350$, is the score assigned to M_{n}

 $S_i = 900$, is the score assigned to \overline{M} .

In the GATE 2021 score formula, M_q is 25 marks (out of 100) or $\mu + \sigma$, whichever is greater. Here μ is the mean and σ is the standard deviation of marks of all the candidates who appeared in the paper.

Qualifying in GATE 2021 does not guarantee either an admission to a post-graduate program or a scholarship/assistantship. Admitting institutes may conduct further tests and interviews for final selection.
